

Note: This product is distributed on a 'try-before-you-buy' basis. All features described in this documentation are enabled. The unregistered version will output flashes with adding watermarks.

About 3DPAGEFLIP PDF Editor

If you have many PDF files to edit, sort or manage every day, do you want to use some single tool to handle all these operations easily? 3DPAGEFLIP PDF Editor is just the easy-to-use but powerful program which helps to modify, assemble and organizing PDF pages.

3DPAGEFLIP PDF Editor gives you a complete set of tools for editing, assembling and rearranging the pages in PDF files. You can use the powerful program to insert, clone, extract, replace, delete, rotate, reorder pages, add security, bookmark, watermark, links, attachments, edit text markups, comments and so on. 3DPAGEFLIP PDF Editor does NOT require Adobe Acrobat, and produces documents compatible with Adobe Acrobat Reader Version 5 and above.

While using 3DPAGEFLIP PDF Editor, you can work more visually with different view models, just set the left view panel as lists of PDF pages, Bookmarks, Attachments and Comments, then you can easy manage and edit the items for PDF files.

The Edit features include:

1. **Page Editing:** including cutting/pasting, cloning, deleting, inserting blank pages, rotating, resizing;
2. **Page Arranging:** including changing page order, reversing, assembling, etc.;
3. **Page Extracting:** extract single pages or a group of pages from PDF file, or extract text only;
4. **Comments:** add comments, edit existing comments;
5. **Bookmarks:** auto create bookmarks based on content, or edit manually;
6. **Security:** set security level for PDF, add ExpiryDate, Sign File, or use advanced fingerprint encryption;
7. **Attachments:** Attach document to PDF;
8. **Others:** merge PDF files, create watermark to add on pages, set PDF properties, add links onto pages, markup text with highlight, underline, etc..

3DPAGEFLIP PDF Editor Easy Modify, Assemble and Organizing PDF

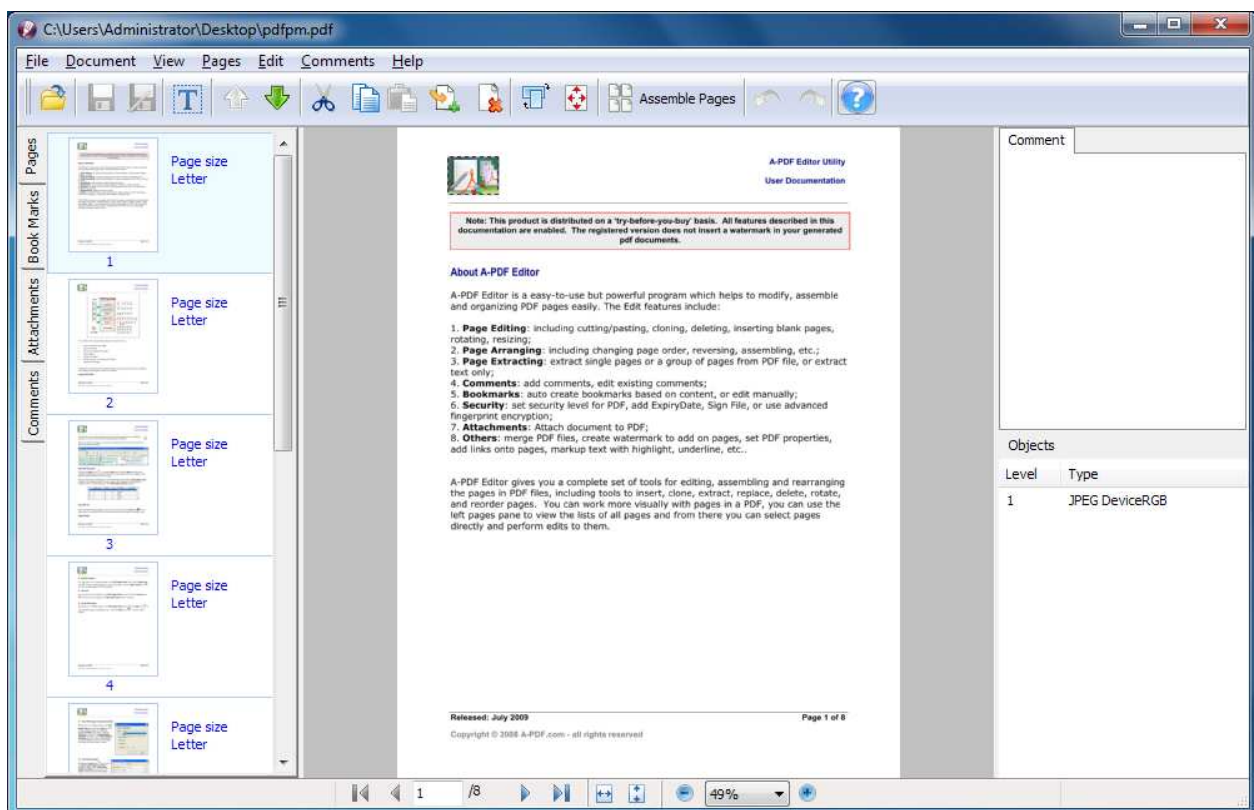

User Documentation

Using 3DPAGEFLIP PDF Editor

3DPAGEFLIP PDF Editor can be started either by launching the application via the desktop shortcut

, or directly from Windows Explorer. When you start the program, you will be presented with the primary screen from which all actions are taken.

Open PDF Document

Clicking the **Open** icon , or selecting **File** then choosing **Open** will open the standard file browse and select window. From that window you can navigate to the folder and find the PDF you want to open

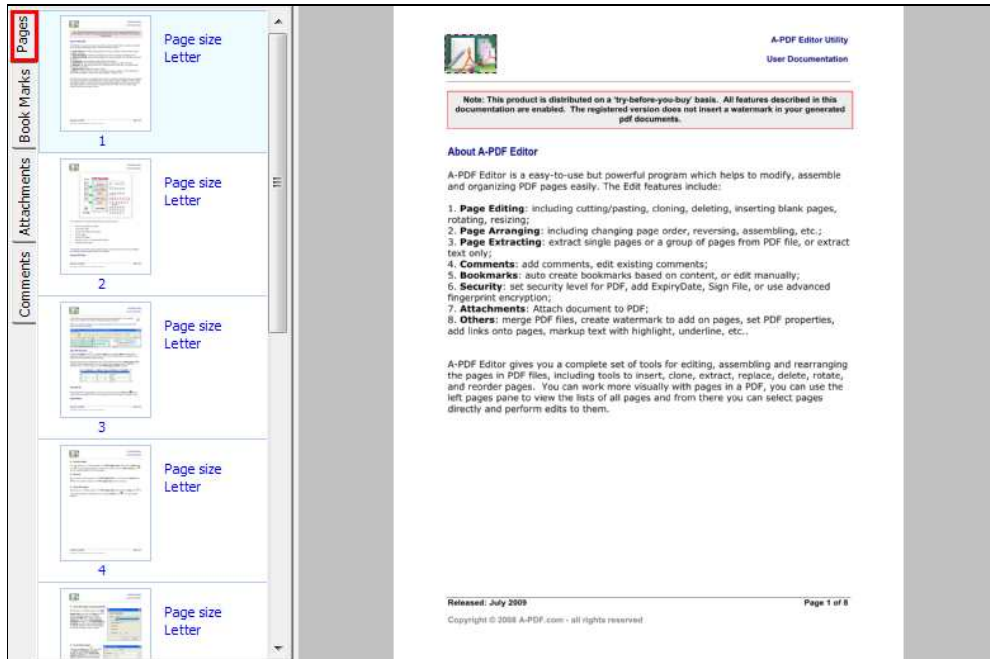

Opened PDF pages are displayed in the 3DPAGEFLIP PDF Editor left window (**PDF pages lists**): as seen in the example blew. You can view any of the pages in the window by 'clicking' them. That will display in right **PDF pages preview** window.

◆ **Edit document properties**

You can set PDF file properties in 3DPAGEFLIP PDF Editor, click "Document->Document Properties" to set File Title, Subject, Author, Keyword as the below window shows:

General Security Initial View Custom

File: C:\Users\Administrator\Desktop\pdfpm.pdf

Title:

Subject:

Author: Administrator

Keywords:

◆ **Document security**

To add security to your PDF file, 3DPAGEFLIP PDF Editor provides different security method. Click "**Document->Document Security**" to add security with below ways:

1. Add passwords to open the document or restrict permissions.

This security method can protect your PDF documents from unauthorized access with standard password security:

40-bit RC4 encryption, which is supported by Adobe Acrobat 3.0 and above;

128-bit RC4 encryption, which is supported by Adobe Acrobat Reader 5.0 and above;

128-bit AES encryption, which is supported by Adobe Acrobat Reader 7.0 and above;

256-bit AES encryption, which is supported by Adobe Acrobat Reader 9.0 and above.

You can also set a password to restrict permissions, like printing, document assemble, form field field fill-in or signing, authoring comments, changing document, copying content, etc.

Security Level: low(40-bit REC; Acrobat 3.0 and above)

Require a password to open the document

Document Open Password: 123

Permissions

Use a password to restrict permissions

Permissions Password: 456

Print Allowed: None

Changes Allowed: None

Enable copying of content

Options

- Printing
- Document Assembly
- Allow Form Field Fill-in or Signing
- Authoring Comments and Form Fields
- Changing the Document
- Allow Content Copying or Extraction
- Content Accessibility Enabled

2. Set Expiry Datetime.

Set expiry date on PDF to make the PDF file unreadable when the computer date time reach the expiry point, just click "**Document->Document Security**", press the "**Set Expiry Datetime**" icon

. You can also provide expiration hint to the PDF users:

General Security Expiry Datetime Initial View Custom

Do nothing

Remove Expiry Dateime

Add Expiry Date

Need to Enable JavaScript in PDF Reader

Set time and date expiration of PDF:

1/ 1/2015 11:49:28 AM

Set expiration hint:

This files has expired!
Please contact the author who send to you to extend the period.

3. Sign File.

Sign your PDF with a digital signature, click "**Document->Document Security**", press the "**SignFile**" icon

The screenshot shows the 'SignFile' tab in the software's settings window. It contains the following elements:

- Input PKCS#12 certificate/private key file (.pfx file):
 - PFX File: [Text input field with browse button]
 - Password: [Text input field]
- Signature details:
 - Reason for signing document: [Dropdown menu with 'I am the author of this document' selected]
 - Location(optional): [Text input field]
 - Contact information(optional): [Text input field]
- [Sign File and Save to] button

4. Advanced Security Method.

Protect your PDF with more advanced method, click "**Document->Document Security**", press the "**Advanced**" icon  to use "**Get Fingerprint**" mode, this encryption "fingerprint" can be used to encrypt a different documents, allows a new document to be encrypted with the same passwords as an existing document without actually knowing these passwords.

The screenshot shows the 'Advanced' tab in the software's settings window. It contains the following elements:

- [Get all Metadata (XMP)] button
- [Apply Metadata to file...] button
- Text: "Set's the document metadata. The metadata must be a valid XMP string, see Adobe's website for XMP documentation."
- [Get Fingerprint] button
- [Apply Fingerprint to file...] button
- Text: "Get the encryption information for PDF. This encryption 'fingerprint' can be used to encrypt a different document. This allows a new document to be encrypted with the same passwords as an existing document without actually knowing these passwords."

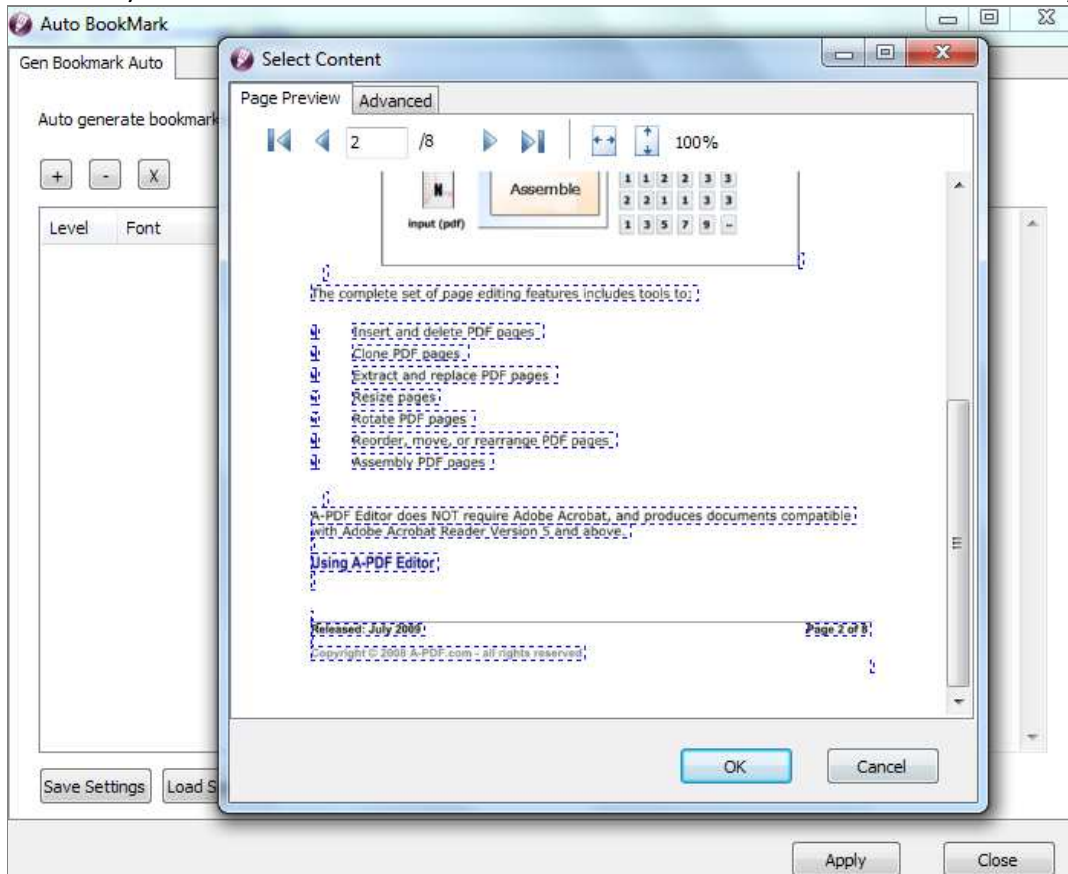

◆ Auto Bookmark

3DPAGEFLIP PDF Editor Easy Modify, Assemble and Organizing PDF

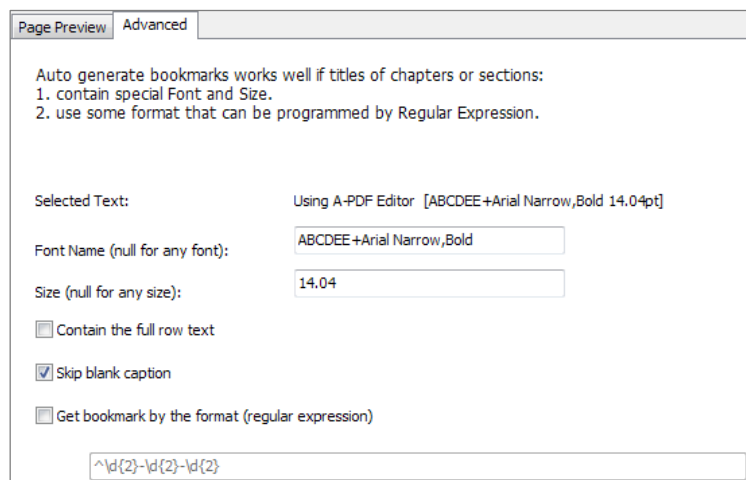

User Documentation

The program 3DPAGEFLIP PDF Editor helps to generate bookmarks automatically based on specified content style in PDF. Just click "**Document->Auto Bookmark**" to define bookmark content type:

You can choose a text box from the "Preview" window first, then define advanced settings. The Auto generate bookmarks works well if titles of chapters or sessions:

1. Contain special Font and Size;
2. Use some format that can be programmed by Regular Expression.

3DPAGEFLIP PDF Editor

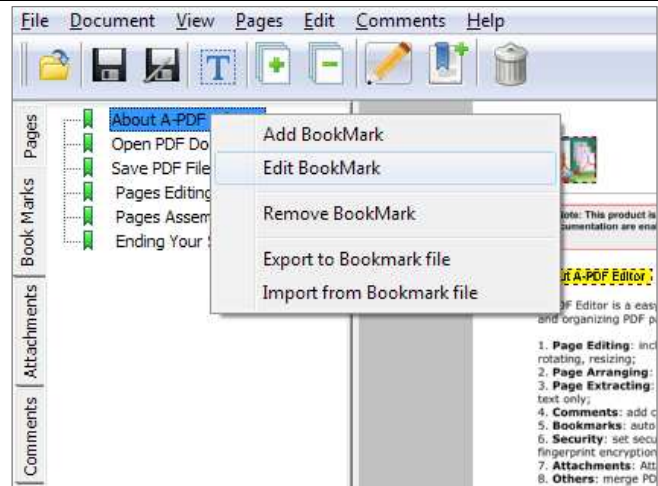

Easy Modify, Assemble and Organizing PDF

User Documentation

◆ View and Edit Bookmark

Click "**View->Bookmark**" to show bookmark panel in the left panel list, and then you can add and edit bookmarks for your PDF file manually.

Click the "**Text Selection**" icon , and then right click the text to "Add Bookmark", then the new added bookmark will be shown in the Bookmark Panel List. You can also Edit, Add, Remove bookmark in the list, even Export to Bookmark file, or import from Bookmark file.
